FHIR fagforum #31

FHIR fagforum 2025-09-10

Topics: FHIR nordics and terminology

Practicalities

Please mute when you are not speaking

Use the «raise your hand»-function to get attention for questions/comments

Or write your question in the chat

FHIR fagforum

- FHIR fagforum (FFF) er et åpent forum om bruk og implementering av HL7 FHIR i Norge. FFF er åpent for alle.

- Meeting details and agenda
  - https://hl7norway.github.io/best-practice/docs/FHIR-faglig-forum/

- Want to present your work using HL7 FHIR?
  - https://github.com/HL7Norway/best-practice/issues/56

- Open discussion on the Norwegian FHIR chat
  - https://chat.fhir.org/#narrow/stream/179226-norway

Agenda

1. Welcome, Thomas og Info fra HL7 Norway Øyvind, 10 min

2. FHIR modernization effort in Denmark, 30 min Ole Vilstrup Møller (Medcom)

3. Nordic terminology server collaboration, 20 min Mattias Colliander (HL7 Sweden)

4. Technical implementation of server and demo, 20 min Vadim Peretokin

5. Whats next for terminology coop nordic, 20 min Daniel Karlson (E-hälsomyndigheten)

6. How we use/plan to use this in Norway, 10 min Thomas T Rosenlund (Helsedirektoratet)

7. Q&A 20 minutter

What do we plan on using tx-nordic for in Norway

Thomas Tveit Rosenlund

HL7 Norway's goals for terminology server

- Keep a copy of the Norwegian edition of SNOMED CT for use by HL7 aware tools and implementations.

- Establish and maintain codesystems and valuesets for norwegian base, core and domain profiles.

  - Maintenance of other valuesets relevant for national implementation guides and API specifications.

- Building IG's with proper expansion of HL7 Norway maintained valuesets.

  - Less build and QA errors.

What we have done so far

- Testing proper expansion of the no-domain valuesets in IG-building.
  - Some of these contain SCT-terms only defined in the Norwegian edition.
- Testing maintenance of HL7 Norway no-domain valuesets.
- Promising results so far, but not production ready yet.

Demo

- Problem ikke ekspansjon av verdisett med norske SCT termer:
  - [NoDomainVitalSignsBloodpressureBodyPosition-ValueSet - v0.9.1](#)
- Løsning Norsk SNOMED CT brukes fra tx-nordic:
  - [NoDomainVitalSignsBloodpressureBodyPosition-ValueSet - v0.9.2](#)
  - Ved å gå mot tx.nordic [NoDomainVitalSigns : Validation Results](#)
  - Men med et hack, vi knyter oss til svensk snomedct [expansion - v0.9.2](#)
  - Mens vi angir at termen i VS er fra norsk edition:
  - (jeg tror det handler om hvordan nordic er satt opp, håper vi kan fikse det)
- Bruke SNOMED CT som kilde til HL7 Norge verdisett
 - [Ontoserver Admin UI](#)

First ever Norwegian FHIR Hackathon

- On the EHiN pre-conference 10th November 2025

- Free event sponsored by HL7 Norway

- Work on four use-cases:
    - Pasientens måledata API
    - Oversikt over kommunale tjenester API
    - Use of the Nordic terminology service
    - FHIR IG authoring and publishing

- Samarbeidsprosjekt mellom HL7 Norge, NHN, Bedredelt, Helsedirektoratet og Felleskatalogen

Next meeting

- Next meeting October

- Discussions on the FHIR chat
  - https://chat.fhir.org/#narrow/stream/179226-norway
- Issues on Github
  - Issues · HL7Norway/best-practice (github.com)
